CAPABILITY STATEMENT

FEIN: 94-3140270 DNB : 024033362

“Partnering with you to accelerate outcomes for your business.”

Consulting Services

Artizen offers a comprehensive suite of consulting services designed to drive digital transformation and innovation. Our expert team provides strategic guidance and hands-on support across various domains, ensuring our clients achieve their business objectives through cutting-edge technology solutions. Our consulting services include: Digital Transformation Strategy, Technology Implementation, Business Process Optimization, Project Management, Change Management and specialized training.

AI & Data Solutions Differentiators

Experts in Gen AI RAG Architecture and Development:

Our team excels in developing robust Generative AI Retrieval-Augmented Generation (RAG) architectures, ensuring seamless integration and optimal performance.

LLM-Based Pilot Design and POCs – Technical Leadership:

We lead the design and implementation of pilots and Proof of Concepts (POCs) using Large Language Models (LLMs), providing technical leadership and expertise.

Supervision for the Client AI Transformation Journey:

We oversee the entire AI transformation journey for our clients, offering strategic direction and continuous support.

AI Go-to-Market (GTM) Capability Assessments:

We assess and enhance our clients' AI Go-to-Market capabilities, ensuring readiness for competitive market entry.

AI Maturity Model and Enterprise AI Readiness:

We evaluate and develop AI maturity models, preparing enterprises for comprehensive AI adoption.

Solutions Business Case Build-Out:

We build compelling business cases for AI and Data solutions, demonstrating value and ROI.

AI Use Case Design to Technology Mapping:

We map AI use cases to appropriate technologies, ensuring alignment with business goals and technical feasibility.

Analytical Program Management and Problem Solving:

Our team excels in managing analytical programs and solving complex problems through innovative solutions.

Data Science Design and Development:

We specialize in the design and development of predictive Machine Learning models and Generative AI solutions.

Responsible AI and AI Risk Management:

We prioritize responsible AI practices and comprehensive risk management to ensure ethical and safe AI deployments.
